## Continuation of Substance of Interview including description of the general nature of what was discussed:

Initially, an agreement was reached to amend the claims of the present application to make them in condition for allowance. The proposed amendments to the claims were received and reviewed by the examiner. However, the provisional obvious-type double patenting rejection is determined to be valid even after the proposed amendments. Therefore, the allowance of the proposed amendments (via examiner's amendment) cannot take place until a terminal disclaimer is filed with respect to copending application, 10799232. For example, the proposed claim amendment to claim 1 of the present application would still be double patenting over claims 1 and 6 of copending application 10799232. In accordance with MPEP 804, the present application cannot be allowed without a terminal disclaimer. Both applications were filed on the same date and the copending application is (at the present moment, because no amendment to the claims is submitted) deemed to be the one with the base claim. Also, the two foreign references (WO 00/19616 and WO 03/005591) are needed in order to consider them in the original IDS submitted. Basically, Applicants agreed to submit: 1.) file a terminal disclaimer, 2.) file the foreign references and 3.) file the agreed proposed amendments to claims 1, 12 and 13 along with new claims 20 and 21. .
